Education

Year	Degree/Certificate	Institute	CGPA/Percentage
2025-2029	B.E. Computer Engineering	Thapar Institute of Engineering and Technology	9.72
2025	CBSE(XII)	Birla Shishu Vihar, Pilani	93.6%
2023	CBSE(X)	Birla Shishu Vihar, Pilani	90%

Experience

- **Hugging Face | huggingface_hub (Open Source)** *October 2026 - Present*
  Open Source Contributor Remote
  - Contribute bug fixes and API improvements to **huggingface_hub**, Hugging Face's official Python client library used to access models, datasets and Spaces on the Hub.
  - Find and fix issues across the codebase, including public API exports and the **MCPClient** (Model Context Protocol) module; **2 PRs submitted, 1 merged** into main.
  - Work through the full open-source workflow: reproducing bugs, writing fixes and tests, and passing maintainer code review and CI in a large production Python codebase.

- **Birla Institute of Technology and Science (BITS) | 5G Systems Lab** *June 2026 - July 2026*
  Hardware Engineering Intern (Under Dr. Sandeep Joshi) Pilani
  - Designed and simulated combinational and sequential logic in **Verilog HDL**, deployed to **FPGA** via Xilinx Vivado.
  - Wrote testbenches validating D flip-flops and adders against **50+ test vectors**, confirming synchronous reset.
  - Authored XDC constraint files mapping logic I/O to physical switches and LEDs for on-board hardware verification.

Projects

- **Duely | AI Invoice Chaser (SaaS)** *October 2026*
  Next.js, LLM API, Razorpay, Vercel **Github**
  - Built and deployed a SaaS that uses an LLM to draft and schedule personalized payment follow-ups for freelancers.
  - Integrated Razorpay payment links so clients pay straight from reminders; shipped live for Galuxium Nexus V2.

- **Pactly | AI Escrow Agent** *October 2026 - Present*
  AI Agents, PayPal Orders API **Github**
  - Building an agent that parses chat-based deals into structured terms and secures funds via PayPal **authorize/capture**.
  - Funds are captured only once both parties confirm delivery; solo entry for the PayPal AI Hackathon.

- **Studylix | Study Operating System** *September 2026 - Present*
  Next.js, TypeScript, PostgreSQL, Inngest **Live link**
  - Designed and shipped a full-stack app unifying timetables, tasks, exams, focus timer and notes, with a relational schema linking every module through subjects.
  - Implemented Google OAuth, **two-way Google Calendar sync**, background jobs with Inngest, and file storage on Backblaze B2; deployed on Vercel with Neon Postgres and separate dev/prod databases.

- **Computer Traffic Controller | RTOS Scheduler Simulator** *August 2026*
  JavaScript, Operating Systems **Live link**
  - Built an interactive RTOS kernel simulator modeling preemptive **Rate-Monotonic** and **Earliest-Deadline-First** scheduling with Gantt-chart visualization.
  - Simulated priority inversion with mutexes, Priority Inheritance Protocol and interrupt-driven preemption.

- **CampusLoop | Campus Transit System** *August 2026*
  Next.js, Tailwind CSS, Leaflet.js **Github**
  - Built an e-rickshaw transit platform with live map tracking, commute matcher, QR passes and admin panel.

Technical Skills

- **Languages**: Python, C++, C, TypeScript, JavaScript, SQL, Verilog HDL
- **AI / ML**: LLM APIs, AI Agents, Prompt Engineering, Model Context Protocol (MCP), Hugging Face, Bedrock
- **Web & Backend**: Next.js, React, Node.js, REST APIs, PostgreSQL, Tailwind CSS, OAuth
- **Tools & Cloud**: Git, GitHub, Vercel, Neon, Inngest, Linux, VS Code, Xilinx Vivado

Certifications & Achievements

- **AWS Generative AI and AI Agents with Amazon Bedrock** – Amazon Web Services
- **Google AI Professional Certificate** – Google
- **Academic Excellence:** Joint Topper in Chemistry (99/100) and 98/100 in Computer Science, CBSE Class XII (2025)
