ABOUT

I design motion for products I build.

I'm a second-year Computer Engineering student at Thapar Institute. I build web apps, and I make their launch films. Because I write the software too, my motion is made for real screens, real taps and real loading states, and it hands off cleanly to the people who build it.

I'm looking for a motion design internship where I can work on product films, UI animation and brand motion.

WHAT I MAKE

FILMS	Product launch and promo films, 20–30 s, in 2D and 3D
UI	Interface animation and micro-interactions
TYPE	Kinetic typography and logo reveals
TIMING	Cutting to music: hits, drops and holds on the beat

IN THIS DECK

01 · P.3	ondo · concept product film
02 · P.6	FOLD · 3D launch film
03 · P.8	TasteLaunch · launch film
04 · P.10	Duely · promo film

01 · CONCEPT PRODUCT FILM

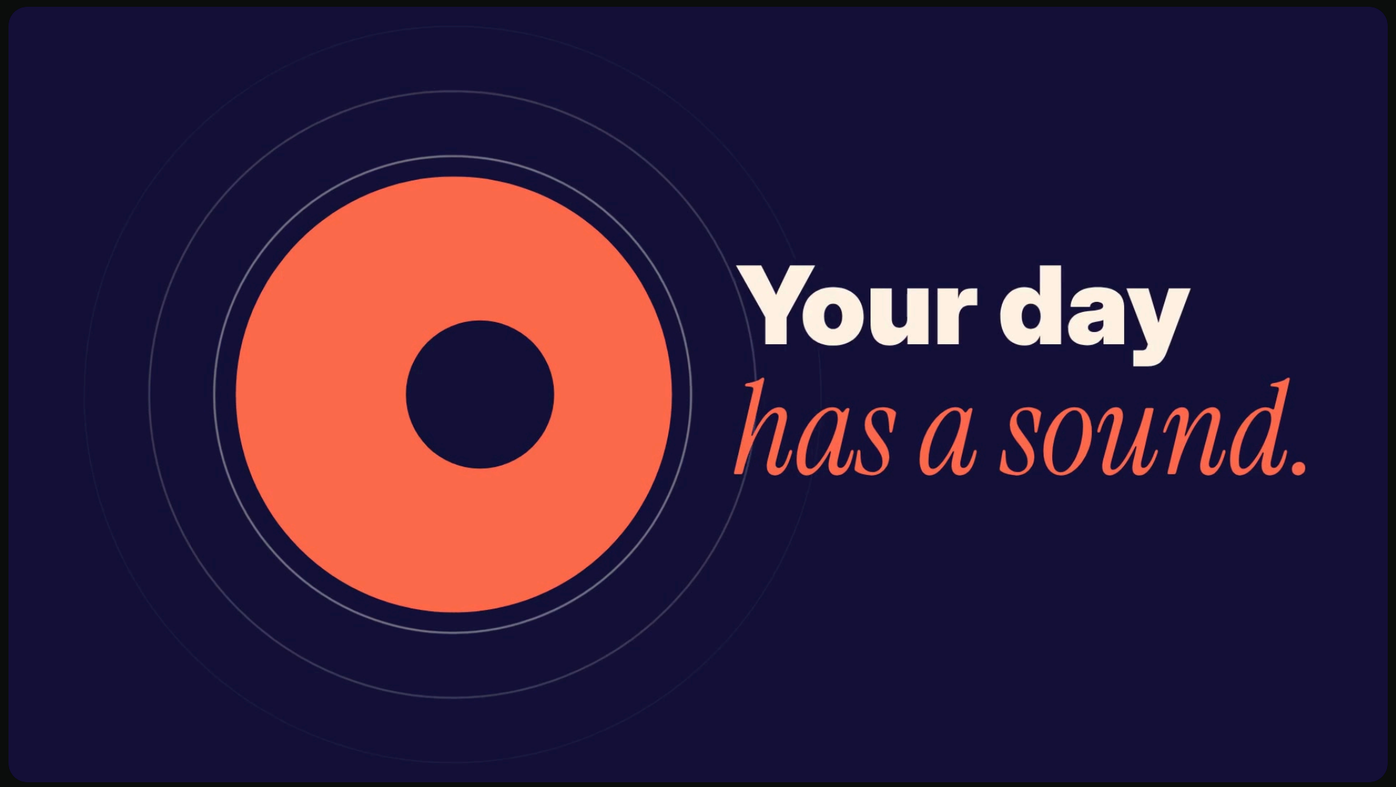

ondo

0:30 | 1920×1080 · 60 fps | 120 BPM | 2026

The brief. Show a music app's core features in 30 seconds so it reads as one idea, not a feature list.

The idea. One coral disc carries the whole film. It is the logo, the play button, the mood picker, the drop, the share token, the EQ handle, and finally the "o" in the wordmark.

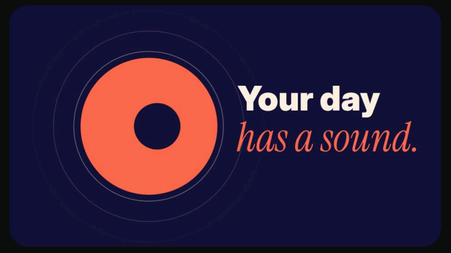

ondo is a fictional brand created for this film.

Watch the film · me-eta-mauve.vercel.app

ondo - the board

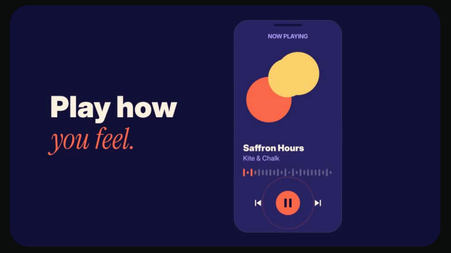

10 SCENES · 1 CARRIER OBJECT

◆ 00:00

Hook

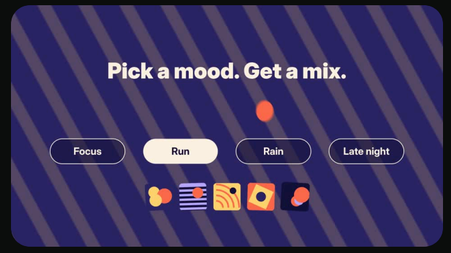

Logo disc and the line "Your day has a sound."

◆ 00:02

Play

Disc lands as the play button; art blooms on tap.

◆ 00:05

Moods

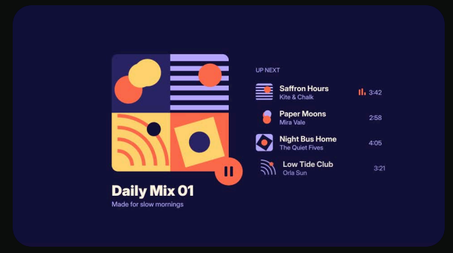

Disc hops chip to chip; each landing floods the frame.

◆ 00:08

The drop

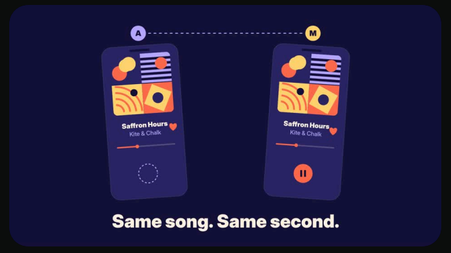

Disc fills the frame on the impact beat.

◆ 00:10

Mix

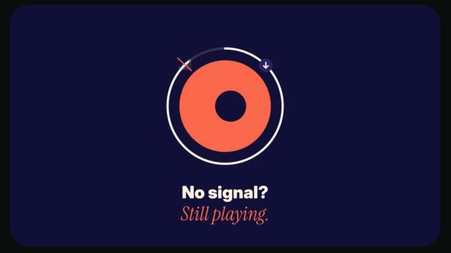

Tiles collapse into a Daily Mix card.

◆ 00:14

Together

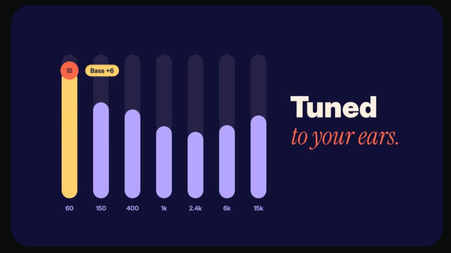

Disc jumps phone to phone; both screens sync.

◆ 00:18

Offline

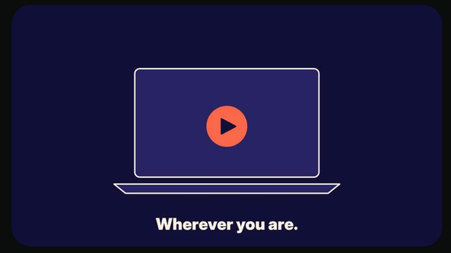

The held breath: signal dies, download lands.

◆ 00:20

Tune

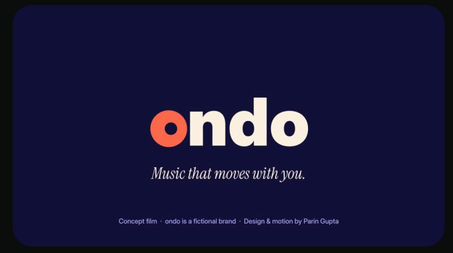

Disc becomes the EQ handle and drags the bass up.

◆ 00:24

Devices

Match cuts on the beat around a disc that never moves.

◆ 00:26

Lockup

Disc lands as the "o" in the wordmark.

ondo - how it's built

PALETTE · SIX COLOURS

INK · #15123B

PLUM · #2B2566

CORAL · #FF6A4D

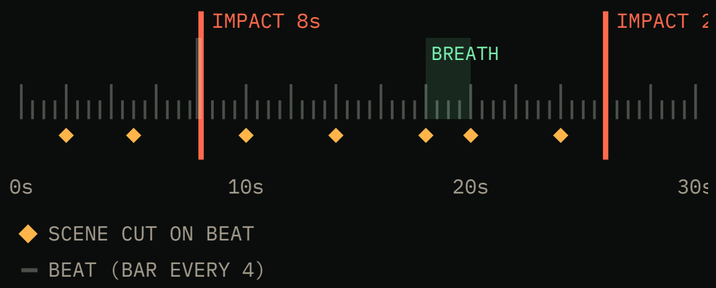

BUTTER · #FFD36E

LILAC · #B9A8FF

CREAM · #FFF3E3

Warm accents on deep ink. Coral is reserved for the disc, so the eye always knows where the story is.

TIMING · AUDIO FIRST

Score at 120 BPM. Every cut, tap and impact lands on the beat grid; a silent beat at 7.75 s sets up the drop at 8.0 s.

FINISH

MOTION	Eased arcs, squash on landings, real motion blur on fast moves
HOLDS	Under 0.1 s of frozen frames in 30 s
SOUND	Mixed to −14 LUFS for streaming
REVIEW	Three critique rounds, each with logged fixes
BUILT IN	JavaScript and HTML Canvas, rendered frame by frame with ffmpeg

02 · 3D LAUNCH FILM

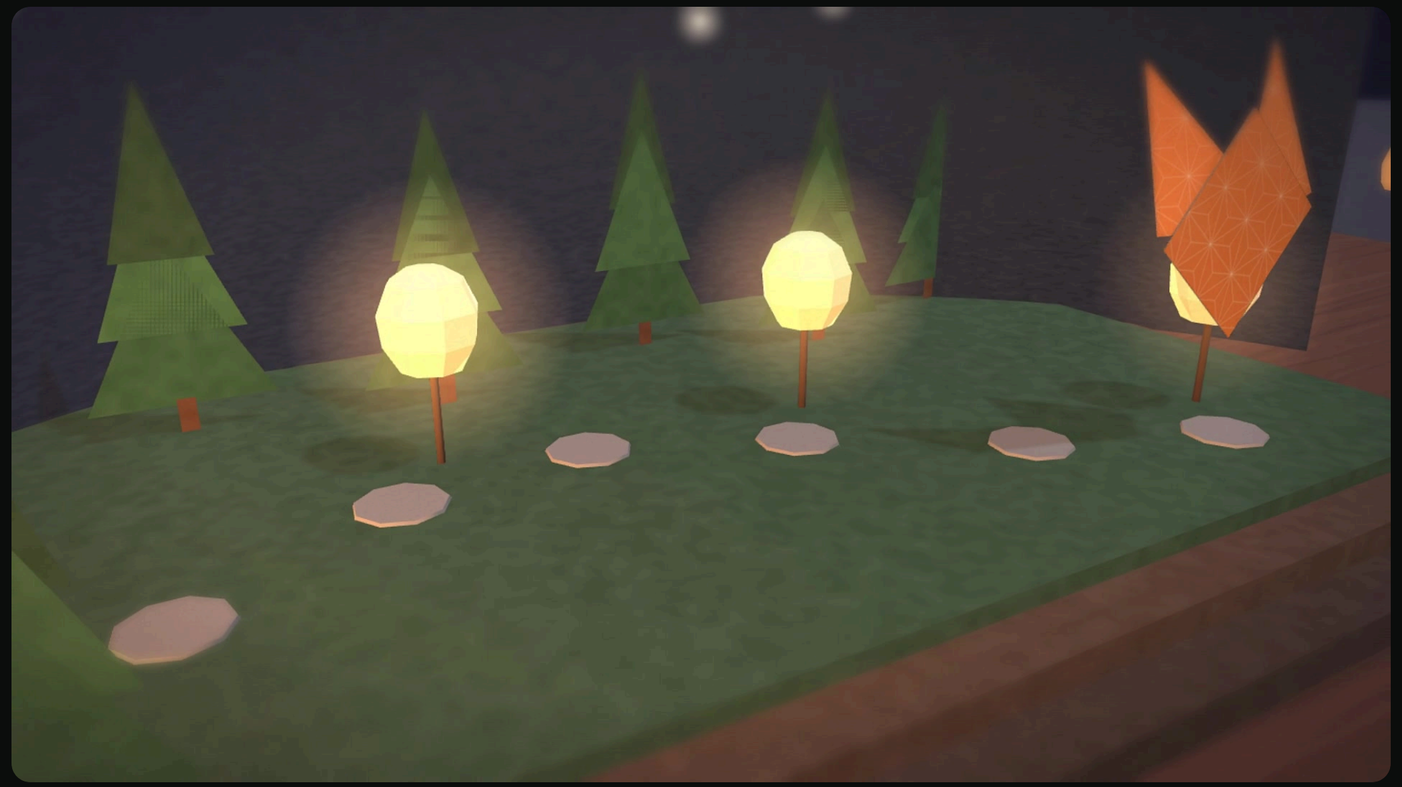

FOLD

0:32 | 1920×1080 · 30 fps | 3D

Meta Start · 2026

The product. My hands-first origami game for Meta Quest, built on Meta's Immersive Web SDK for the Meta Start Developer Competition.

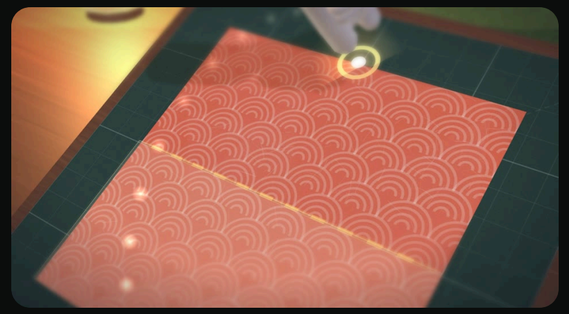

The film. A sheet is folded by hand into a fox, a boat and a plane, each model comes alive in its own small paper world, and the film closes on six chapters under a sky of floating lanterns. Warm lamp light, soft depth of field and a slow, hand-paced rhythm.

Watch the film · me-eta-mauve.vercel.app

FOLD - key frames

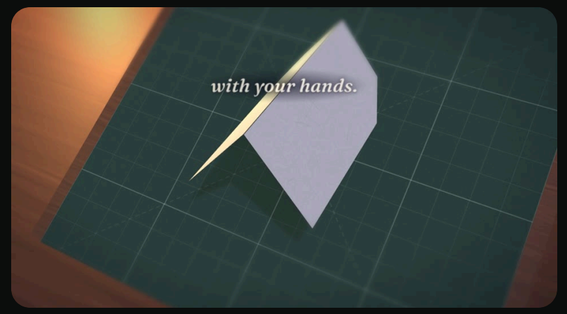

8 BEATS IN 32 S

00:00

First crease

A glowing fingertip scores the first fold line.

00:06

By hand

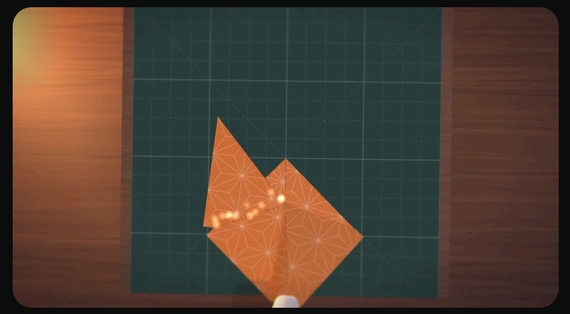

The sheet lifts and folds along the crease.

00:09

Fox, step one

Patterned paper, folded with a real hand rig.

00:11

The fox

Ears form as the last folds settle.

00:18

Comes alive

A paper boat drifts out onto a lily pond.

00:23

Night flight

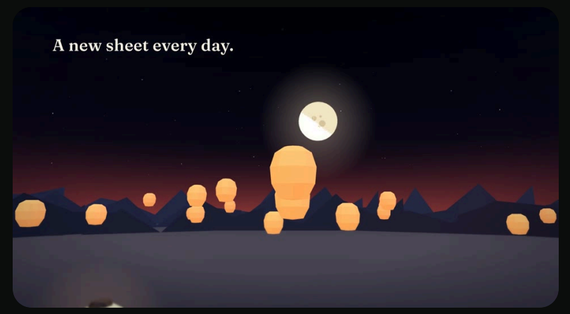

A paper plane circles a lighthouse.

00:25

Six chapters

Every finished model lined up on the shore.

00:28

A new sheet

Lanterns rise into the sky before the lockup.

03 · LAUNCH FILM

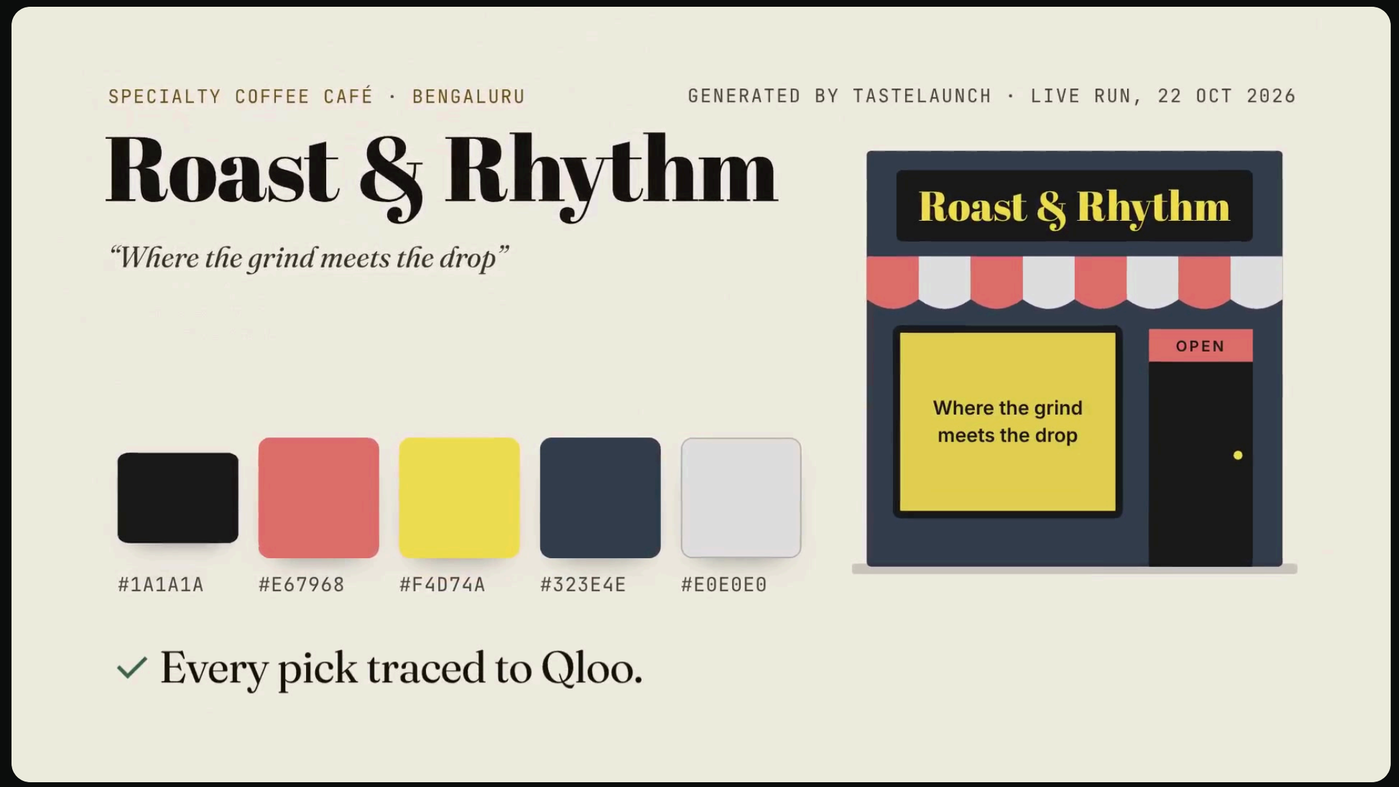

TasteLaunch

0:24 | 1920×1080 · 60 fps

Qloo hackathon · 2026

The product. An AI co-founder that designs a local business around what people nearby actually like, using Qloo's taste data.

The film. One typed idea becomes a named café with its own palette and storefront, then a side-by-side proves the picks are better with Qloo. Editorial serif type on warm paper, with a red wipe that carries the viewer between acts.

Watch the film · me-eta-mauve.vercel.app

TasteLaunch - key frames

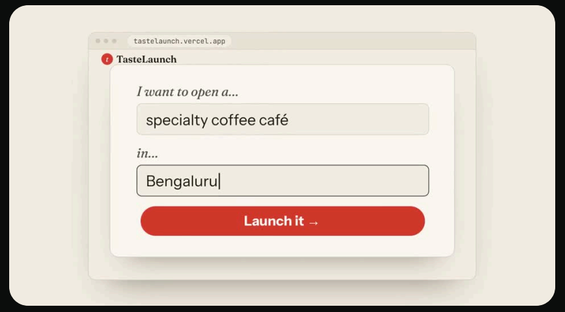

8 BEATS IN 24 S

00:01

Hook

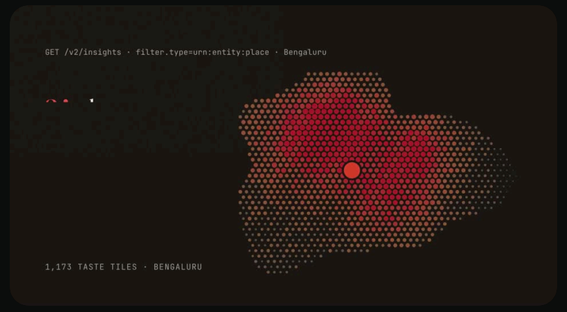

Editorial headline with a hand-drawn underline.

00:04

The prompt

An idea and a city, typed in live.

00:06

Taste map

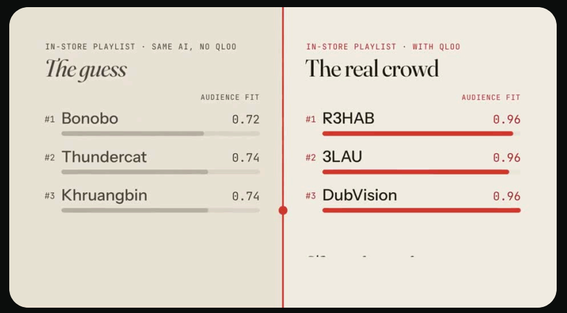

The city lights up tile by tile from Qloo data.

00:08

Red wipe

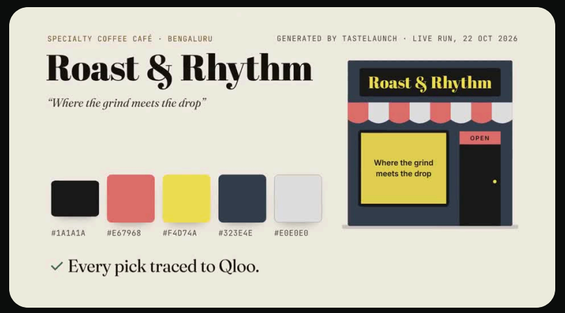

A colour wipe carries the viewer into the proof.

00:10

Guess vs crowd

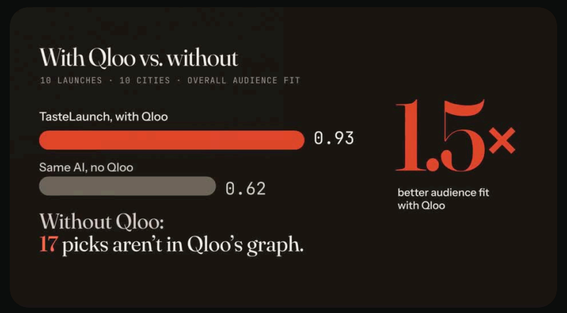

A plain guess against what locals actually like.

00:16

The brand

Name, palette and storefront assemble on screen.

00:20

The proof

Bars race to show the gain from Qloo.

00:23

Lockup

Logo, URL and a clear call to action.

04 · PROMO FILM

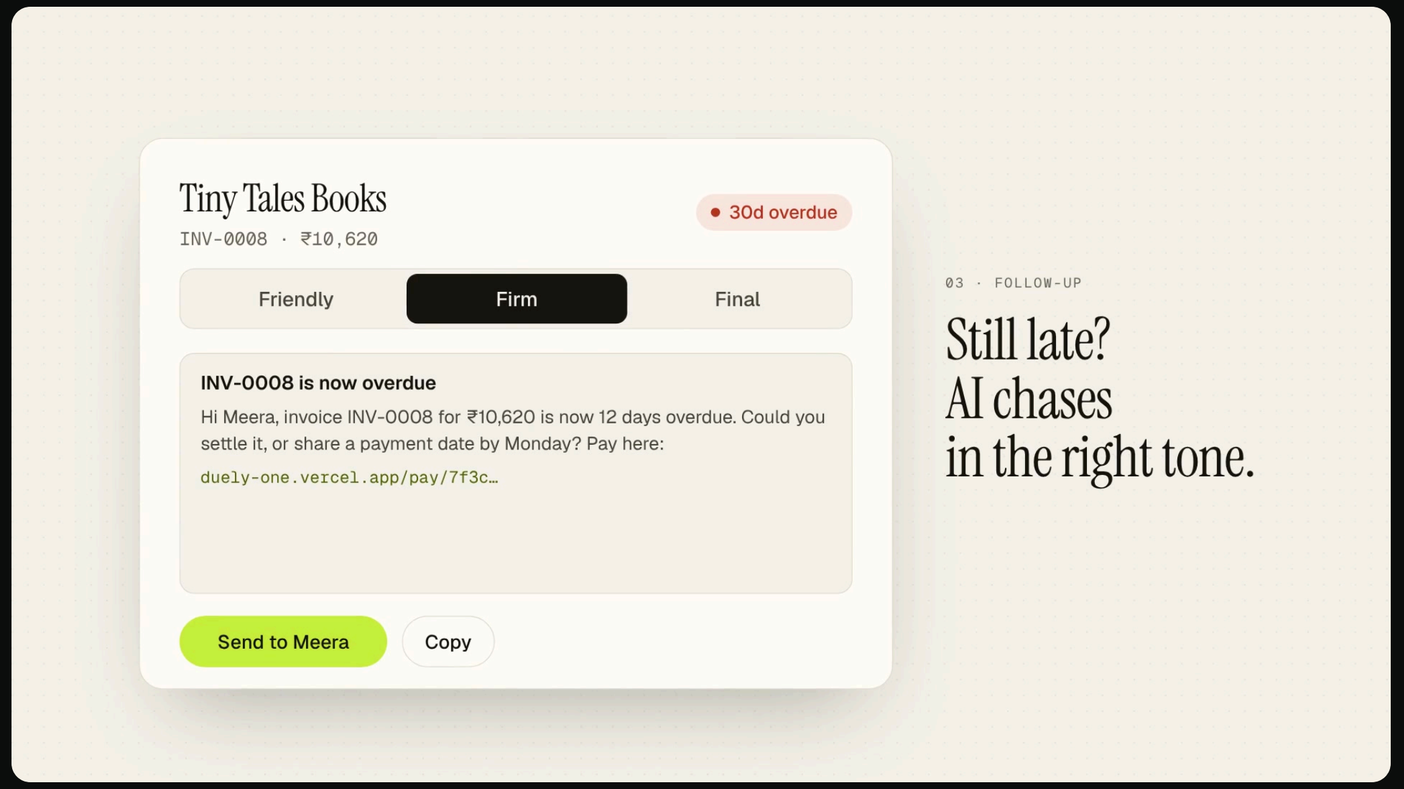

Duely

0:30 | 1920×1080 · 60 fps

Galuxium Nexus V2 · 2026

The product. An AI invoice chaser for freelancers. Describe the work in one sentence, get a GST invoice with a payment link, and let the AI follow up.

The film. Opens on the problem, then follows one invoice from a typed sentence to "Paid", with reminders that get firmer the later it is. Directed and produced by me for my solo hackathon entry.

Watch the film · me-eta-mauve.vercel.app

Duely - key frames

8 BEATS IN 30 S

00:01

Hook

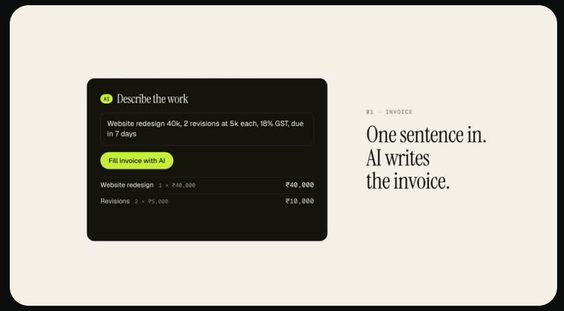

A hard stat in big type opens the film.

00:04

The problem

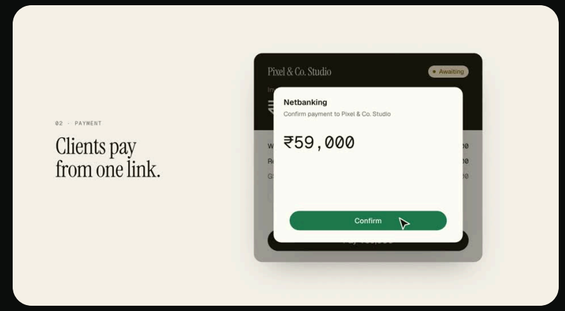

Overdue invoices stack up, chasing is unpaid work.

00:08

One sentence in

A typed sentence becomes an itemised invoice.

00:12

One link

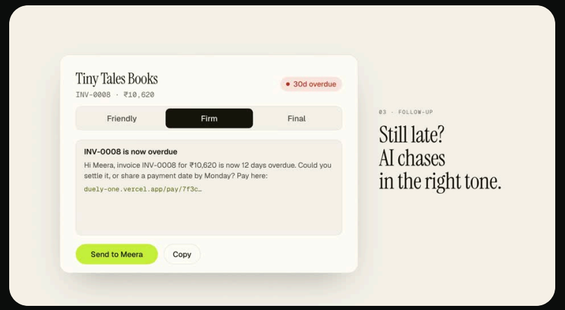

The client pays from a single checkout.

00:14

Paid

Verified and marked paid, with a soft glow.

00:18

Right tone

Reminders switch from friendly to firm to final.

00:22

Insight

Who pays late, and what cash flow looks like.

00:28

Lockup

"Get paid on time." with the live URL.
